

Rubber Pump Flexible Connection

Product Description

Rubber Pump Flexible connection for use to neutralise movement and reduce noise & vibration in pipework. Significantly reduces the transmission of sound & vibrations from plant items.

Design Features

- Max Working Pressure of 10 Bar
- Max Working Temperature of 82°C
- Should not be used at Max temp & Max pressure respectively.
- Nylon reinforced rubber body with EPDM liner and cover
- Fitted with Galvanized Female Union ends
