

Kage Lock Data Sheet

Product Description

An attachment for the Ninja Spring Hangers to lock off the unit, engineered to temporarily lock your springs and handle additional loads during transport, installation, and cantilevering pipework during installation stages. When job is complete simply remove it.

Design Features

Built from high grade steel, finished in Electro paint or HDG so suitable for internal or external use.

Locks off spring movement and allows for adjustment upon removal.

Can be fitted to standard version of Spring Hanger.

Temporary Lock Off - Ideal for modular assemblies that will be transported to site.

Retrofit ready - Fits directly to existing units

Removable Design - Restores full isolation instantly

Applications

- For Ninja Spring Hangers 5kg to 400kg
- Modular construction transport
- HVAC & MEP equipment installation
- Generator and plant room setups.
- Pipe load cantilevering during build stages
