

Kage Lock Quad Dragon Data Sheet

Product Description

An attachment for the Quad Dragon Spring Hangers to lock off the unit, engineered to temporarily lock your springs and handle additional loads during transport, installation, and cantilevering pipework during installation stages. When job is complete simply remove it.

Design Features

Built from high grade steel, finished in Electro paint or HDG so suitable for internal or external use.
Locks off spring movement and allows for adjustment upon removal.
Temporary Lock Off - Ideal for modular assemblies that will be transported to site.

Removable Design - Restores full isolation instantly

Applications

- For Ninja Spring Hangers 1000kg to 1600kg
- Modular construction transport
- HVAC & MEP equipment installation
- Generator and plant room setups.
- Pipe load cantilevering during build stages

Part Number	Load (Kg)	Static Deflection (mm)
QuadDragon-1000-50-BLUE-WHITE-KL	1000	50
QuadDragon-1200-50-RED-KL	1200	50
QuadDragon-1600-50-RED-PURPLE-KL	1600	50
